## Year 7-9 Hands-on Problem Solving Workshops TODIETTS PALLETTS PICLUTES PUZZIES

## **Immerse your students in Mathematical Problem Solving**

Students will: • Extend their understanding of strategic problem solving

• Work together on our diverse range of original hands-on problems

"What an awesome, math and fun filled day! Challenging and encouraging all at the same time."

Stephanie O'Sullivan - St Patricks College, Strathfield

"Inquisitive Minds presented the students with a fantastic variety of mathematical challenges which kept them (and the teachers) engaged and entertained all day!"

Lauren Broady - Lucas Heights Community School

"Group work + Challenging Problems + Chocolate = Fun. We all know how Maths problems can be engaging and stimulating but it takes enormous time and energy to prepare. Inquisitive Minds can take care of it all for you." Doug Vass - Newington College

## talented 1712ths Workshops

Expose a group of your capable students to four hours of problem solving alongside like-minded peers at one of our Talented Maths Workshops.

Our unique workshops include an interactive lesson on problem solving strategies plus a hands-on problem solving competition.

Dates and locations of upcoming events may be found at inquisitiveminds.com.au

Positions fill quickly. Book early to avoid disappointment! Contact us if you would like to request a Talented Maths Workshop in your area, or if you would be willing to host a workshop in your school. (Discounts are given to

hosting schools)

## maths for the masses

Teachers from all over NSW have been amazed how PPPP not only engages and extends capable students, but it also makes problem solving fun and achievable for those who aren't normally so excited about Maths.

Make an In-school booking to share the PPPP experience with a larger group of your students.

We are able to run:

- A whole day workshop or
- Two half day workshops or
- Three 100 minute workshops in a day.

The ideal size of each workshop is 60 students. Workshops will be adapted to suit the mathematical ability of your students.

Contact us or go to **inquisitiveminds.com.au** for more information about how to share PPPP with your students.
